SUMMARY

Data Analyst and Visualization Specialist with a strong foundation in transforming complex datasets into actionable business insights. Skilled in Python (Pandas, NumPy, Seaborn), SQL, and Tableau, with hands-on experience building interactive dashboards and scalable data pipelines. Demonstrated expertise in spatial data analysis and machine learning through remote sensing projects at the Indian Space Academy, processing over 7,995 sq km of geospatial data. Adept at leveraging analytical skills to drive data-driven decision-making and build impactful visual reporting systems.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, SQL
- **Libraries:** Pandas, NumPy, SciPy, Statsmodels, Matplotlib, Seaborn
- **Visualization:** Tableau, Power BI
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Tools:** Google Earth Engine, AWS, Git, GitHub, Jupyter Notebooks
- **Other:** Statistical Analysis, Geospatial Analytics, ETL Pipelines, NDVI Analysis

PROJECTS

Chocolate Sales Data Analytics & Dashboarding

Tools: Tableau, Python, Pandas, Git

- Engineered an ETL pipeline to extract, clean, and merge 1M+ rows of sales data across 5 relational tables
- Conducted EDA and statistical hypothesis testing (ANOVA, Chi-Square, T-Tests) to uncover profitability drivers
- Built 3 interactive Tableau dashboards (Sales, Customers, Stores) to translate statistics into business insights

Global Supply Chain Optimization Analysis

Tools: Python, SQL, Power BI

- Analyzed 500K+ global logistics records via Python and SQL to identify supply chain bottlenecks
- Developed predictive clustering models to segment suppliers and forecast inventory shortages with 85% accuracy
- Built an executive Power BI dashboard visualizing transit times, defect rates, and cost variances to project a 12% reduction in freight costs

WORK EXPERIENCE

Data Analytics & Remote Sensing Intern

Indian Space Academy

Remote

Jan 2026

- Developed an AI-enabled geospatial analysis system using Google Earth Engine and NDVI differencing algorithms to detect forest cover changes
- Processed, cleaned, and analyzed massive spatial datasets covering a 7,995 sq km area, successfully quantifying 309.73 sq km of forest loss and 343.73 sq km of forest gain
- Automated data extraction pipelines to streamline the classification and visual reporting of complex ecological metrics

EDUCATION

Bachelor of Technology (Computer Science)

Newton School of Technology, Rishihood University

CGPA: 6.5 / 10

2024 - 2028

Intermediate (Class XII)

Sardar Doon Public School, Dehradun

Grade: 78.4%

2022 - 2023

Matriculation (Class X)

Sardar Doon Public School, Dehradun

Grade: 82.0%

2020 - 2021
